Office Action Summary	Application No. 10/539,640	Applicant(s) LEMAIRE ET AL.	
	Examiner CHUKWUMA O. NWAONICHA	Art Unit 1621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 February 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 65-68, 74 and 94 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 65-68 and 94 is/are rejected.
- 7) ☒ Claim(s) 74 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 27 February 2009 has been entered.

Current Status

1. Claims 65-68, 74 and 94 are pending in the application.

Priority

Applicants' claim for domestic priority under 35 U.S.C. 119(e) is acknowledged.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Art Unit: 1621

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 65-68 and 94 are rejected under 35 U.S.C. 103(a) as being unpatentable over Guo-Jun Deng et al., {A novel system consisting of easily recyclable dendritic Ru-BINAP catalyst for asymmetric Hydrogenation, Chemical Communications (Cambridge, United Kingdom) (2002), (15), 1570-1571}, Fan et al., {Highly Effective Soluble Polymer-Supported Catalysts for Asymmetric Hydrogenation, Journal of the American Chemical Society (1999), 121(32), 7407-7408} or Okano et al., {US 4,705,895}.

Applicants claim a diphosphine compound of formula 1; wherein all the variables are as defined in the claims.

formula 1

Determination of the scope and content of the prior art (M.P.E.P. §2141.01)

Guo-Jun Deng et al. teach a diphosphine compound as shown below. See first page, scheme 2.

Art Unit: 1621

Fan et al., teach a diphosphine compound as shown below. See compound on page 789.

Okano et al. teach a diphosphine compound as shown below. See column 2.

Ascertainment of the difference between the prior art and the claims (M.P.E.P. §2141.02)

Applicants claimed diphosphine compound of formula 1 differs from the diphosphine compounds taught by Guo-Jun Deng et al., Fan et al. and Okano et al. in that Applicants claimed diphosphine compound is a structural isomer of those diphosphine compounds taught by the prior art references cited. Specifically, Applicants claimed diphosphine compound wherein the variable X_1 and X_2 are amide group shown below, and the carbonyl of the amide group is attached to binaphthyl of formula 1 while Guo-Jun Deng et al., Fan et al. and Okano et al. teach diphosphine compounds wherein the amine of the amide group shown below is attached to the binaphthyl compounds shown above.

Amide group

Finding of prima facie obviousness--rational and motivation (M.P.E.P. §2142-2143)

The instantly claimed diphosphine compound of formula 1 would have been suggested to one of ordinary skill in view of the teachings of the prior art references cited.

One of ordinary skill in the art would have a reasonable expectation of success in practicing the instant invention by evaluating different binaphthyl compounds from the teachings of Guo-Jun Deng et al., Fan et al. and Okano et al. to produce a diphosphine compound of choice. Said person would have been motivated to practice the teaching of the references cited because they demonstrate that diphosphine compounds are useful as metal catalyst ligands for asymmetric Hydrogenation. Additionally, the prior arts substituted diphosphine compounds are isomers of the claimed substituted diphosphine compounds of the general formula 1, and isomers are obvious because of their physical and chemical properties relationship. The instantly claimed invention would therefore have been obvious to one of ordinary skill in the art.

Allowable Subject Matter

Claim 74 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chukwuma O. Nwaonicha whose telephone number is 571-272-2908. The examiner can normally be reached on Monday thru Friday, 8:30am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel Sullivan can be reached on 571-272-0779. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
